

EZTC Delivery Trailer

ACLT7000 EZTC Delivery Trailer

Transports ASME Residential Storage Tanks & Cylinders

The ACLT7000 is a versatile alternative to dedicated cylinder delivery trucks. Utilize lighter duty pickups and service vehicles to transport ASME tanks and cylinders to the customers location. 100% aluminum construction with an open bulkhead to allow the dome of the tank to extend out over the tongue of the trailer.

Lift assisted tailgate is specifically designed to accommodate our EZTC717 ASME Tank Carrier. Carry up to a 1,000-gallon tank and our tank dolly. Optional side gate accommodates the RTC420.

For companies watching their bottom line, convert any delivery truck, pickup, or van into an affordable, all-purpose, installation asset. Used in conjunction with any of our motorized or manual tank dollies, the job of transporting and installing any size tank or cylinder to the job site becomes a one person job.

Specifications

GVWR:	7,000 lbs. - (2) 3,500 lb. low profile Dexter Low Profile Torflex® axles
Tires:	4 - 225/75R15D 6-5.5" wide, white spoke wheels
