

# RTC420M2 Tank Dolly

## RTC420M2 Manual Tank Dolly

*Install and remove full or empty 420 lb. cylinders*

The RTC420M2 is a manual tank dolly designed to safely transport full 420 lb. D.O.T. propane cylinders.

One man setting full cylinders contributes to greater efficiency on every installation. Of course, sometimes the reality of an installation makes it a two man job, especially when using a manual cart. Unlike a standard two-wheel cart, our dolly provides a stable and secure platform for one, or even two men to muscle a tank into position on the majority of simple installations.

All points where the tank comes in contact with the cart are fully padded to protect the finish of your tanks. The RTC420M2 can also be used with 100 or 200 lb. cylinders, in addition to 55-gallon drums.

Similar to our motorized version the 420M2 uses a split handlebar design. Strap the tank to the upper set of handle bars, pull the tank onto the cart and go. The handlebars lock together in the down position.

## Specifications

**Weight:** 165 lbs.

**Carry Capacity:** 900 lbs.

**Height:** 40 in. (Transport position)

**Depth:** 64 in.

**Width:** 39 in.

**Straps:** 1-10,000 lbs., nylon

**Pads:** 4 Cross brace tank bumpers

**Construction:** Tubular steel

**Tires:** High Flotation & Swivel Caster

**Color:** Black, Powder Coat

**Assembly:** None required

**Shipping:** LTL Common Carrier

SHOWN WITH OPTIONAL KICK PLATE

## Features

- Transports full cylinders;
- Heavy duty, 100% steel construction;
- Lightweight;
- Pushes easily on all surfaces;
- Low maintenance requirements;
- Manufactured in the USA; and,
- Works with all optional adapters for 100 lb. & Horizontal 120-gallon tanks.
