Motorized Tank Dolly

RTC420NG3 Motorized Tank Dolly

Install and Remove Full or Empty 420 lb. Cylinders

Simplify the installation of 420 lb. D.O.T cylinders utilizing one man.

Specifications

Engine: Kohler®, Command Pro CV173

Weight: 267 lbs.

Carry Capacity: 900 lbs.

Height: 40 in. (Transport position)

Depth: 64 in. Width: 36 in.

Transmission: Peerless® MST-205

Drive: Dual wheel, chain drive **Straps**: 1-10,000 lbs., nylon

Pads: 4 Cross brace tank bumpers

Construction: Tubular steel

Tires:(2) 480-8, 2-ply AGR, Swivel Caster

Color: Blue, Powder Coat
Assembly: None required
Shipping: LTL Common Carrier

Three wheel design supports weight of the tank.

Handles lock together for transport.

Transport full 420 lb. D.O.T. cylinders.

The RTC420NG3 is a motorized tank dolly that is designed to safely carry a full 420 lb. D.O.T. propane cylinder, eliminating the need for a followup bobtail delivery once installed. One operator handling full cylinders increases efficiency on every 420 installation.

The NG3 features a 3-speed, gear drive, Peerless® transmission which provides three forward speeds and one reverse gear. While transporting a tank, all the weight of the cylinder rests on the heavy-duty swivel caster.

The operators supports none of the weight. Their only job is to maneuver the dolly to the installation location, across yards, fields, parking lots, construction sites, minimizing the amount of damage that could occur to the customers landscaping caused by heavy crane trucks.

Features

- · Transports full cylinders;
- · Heavy duty, 100% steel construction;
- · Lightweight;
- · Pushes easily on all surfaces;
- · Low maintenance requirements:
- Manufactured in the USA; and,
- Works with all optional adapters for 100 lb. & Horizontal 120-gallon tanks.
