

## Model RRC-1648 Rotary Refuse Chopper

The biggest advantage of owning the RRC-1648 is that it lets you reuse your plastic mulch. When preparing a bed for the second, or even third crop, this unique rotary chopper makes removing depleted tomato, cucumber, pepper, or just about any other variety of plant on existing plastic covered (raised or flat) beds possible.

Adjustable in one inch increments, from one to 19 inches, this chopper is also practical on less than perfect ground conditions; and, in all types of soils including sand, and gravel. At the end of the season, and prior to picking up the plastic, refuse is discharged on both sides of the unit making in-row clean up fast and easy.

Recurved, reversible carbon steel cutting blades protect the rotary blade assembly from abrasion and ware. This new design allows the operator to set the cutting height closer to the top of the bed, without running the rotary assembly to close to the plastic, or dirt. An anti-scalp roller follows the contour of bed.

### Specifications

- Gauge Roller . . . . . 12" OD, 42" long
- Cutting height . . . . . 1" to 19"
- Overall length . . . . . 188"
- Overall width . . . . . 77"
- Weight . . . . . 1600 lbs.
- Gear Box . . . . . 100 HP, 1:1 ratio
- Drive line: . . . . . Rated 100HP
- Hitch . . . . . 3-Point, Category
- Tire centers . . . . . 72"
- Tire size . . . . . 670-15 x 4ply rib type tire

The chopper comes fully assembled and is shipped F.O.B. North Collins, NY. Allow 2 to 4 weeks for delivery. Sorry, no color options. 1/2 down payment required to secure order with balance due upon delivery, unless other arrangements have been made prior to delivery.
